

AFTER SCHOOL EDUCATION AND SAFETY PROGRAM PLAN GUIDE

Expanded Learning Division
California Department of Education
1430 N Street, Suite 3400
Sacramento, CA 95814-5901
916-319-0923

ROCKETSHIP PUBLIC SCHOOLS

This Program Plan Guide is required by California *Education Code (EC)* 8482.3(g)(1). It must be completed in its entirety and submitted as part of the After School Education and Safety (ASES) Grant Renewal application process.

Revised October 2023

Rocketship Los Suenos Academy After School Program Plan Guide

Include the following information along with your ASES Program Plan:

1. Grant Identification Number - **43-23939-S127-EZ**
2. County District School (CDS) Code - **43104390120642**
3. Authorized Signatory (Fiscally responsible for the program)
 - a. Name: Maricela Guerrero
 - b. Title: California Executive Director
 - c. Contact Info
 - i. Phone: 408-506-4055
 - ii. Email: mguerrero@rsed.org

Rocketship Public Schools After School Education and Safety Program Plan Guide

Name(s) of After School Program Site(s)

Instructions: Use the following worksheet example to list the site name and the projected daily attendance for the expanded learning program.

Site Name	CDS Code
1. Rocketship Los Suenos Academy	43104390120642

Instructions: Use the following worksheet example to indicate the target population for each program. (For example: Homeless, Foster Care, English Language Learner, etc.)

Target Population	Percentage of School Population
Rocketship Socioeconomically Disadvantaged	86%
Rocketship English Learners	62.8%
Rocketship Students with Disabilities	11.3%

Purpose

The purpose of the program plan is to create an operational design of an after school program within the framework of the requirements defined in *EC* sections 8482 et seq., and to describe program activities which support students' development of Social and Emotional Learning (SEL) skills. The SEL is about helping students develop a range of skills they need for school and life. Social-Emotional skills include the ability to:

- Set and achieve positive goals;
- Feel and show empathy for others;
- Establish and maintain positive relationships;
- Make responsible decisions; and
- Understand and manage emotions.

All of these skills are necessary—both for educators and students—to function well in the classroom, in the community, and in college and careers.

After School Education and Safety Program Plan Guide

Instructions

The program plan is considered a living document that is periodically reviewed and adjusted to reflect the needs of the community and to provide continuous improvement in the development of an effective after school program.

The after school grantee is responsible for creating, reviewing, and updating the program plan every three years (*EC Section 8482.3[g][1]*). The grantee must work collaboratively with after school partners and staff to develop and review the program plan. If the grantee subcontracts with an outside provider to operate the after school program, the grantee is ultimately responsible for the plan. The grantee should include the subcontractor in the development and review of the plan and provide a copy of the document to the subcontractor. It is recommended that the plan be reviewed annually.

The Expanded Learning Division adopted the Quality Standards and introduced requirements for Continuous Quality Improvement (CQI) to help programs to engage in reflection and be intentional about program management practices and activities delivered to students. To create the program plan, provide a narrative description in response to the prompts listed under each Quality Standard section. The grantee may customize and include additional prompts, such as describing SEL activities, to refine your plan. In addition to the narrative response, it may be useful to include tables, charts or other visual representations that contribute to the understanding of the before and after school program.

1—Safe and Supportive Environment

- If the program will be located off campus, describe how students will travel safely to and from the program site.

YMCA After School Program (ASP) operates at Rocketship. Students will attend the After School Program at their school; therefore, safe travel to the program site is not an issue. Most students are picked up by family members who are required to sign students out of the program when they are picked up. Students who walk home are required to have a walk home permission slip on file.

YMCA After School Programs are ADA compliant and maintained to minimize risk to students and staff. Our commitment to safety has produced policies and procedures to protect students and staff. We conduct ongoing site safety reviews and train Y staff in: risk management, safety and first aid, injury, illness, child abuse prevention, and school safety procedures, which include lockdown and fire drills. We participate on city gang task forces and maintain strong relationships with local police.

Our policies prohibit releasing students to anyone not on the parents' list or under the influence of drugs or alcohol. We check IDs when an unrecognized person tries to pick up a student, monitor anyone loitering on campus, and call police about suspicious individuals. Staff monitor students' whereabouts, maintain a daily sign-in/out roster, and stay with any student not picked up by 6 pm until the situation is resolved

After School Education and Safety Program Plan Guide

- Describe the initiatives and measures that will be taken by the program to create safety procedures that are aligned with the instructional day, including regular staff training and practice drills with students and staff.

The Y works closely with school site staff on each site's safety plan, which is updated annually. Our ASP program staff follow all school and district policies and procedures pertaining to safety, as well as the Y's safety policies outlined above. As well as a monthly safety topic and drill this ensures the safety of students and staff within the program

Y staff train with school site staff on a variety of procedures to align with the school day practices including active shooter on campus, lockdown, earthquake and fire, evacuation, and medical emergency response. Our Site Directors create school-aligned health and safety plans for all ASPs that are consistent with the plans required by law for regular day programs (fire, lockdown, earthquake, etc.). ASP safety plans and procedures are discussed and evaluated at staff meetings and updated as needed. Site Directors participate in all regular day safety trainings and drills, and all Y ASP staff and students participate in safety drills during ASP that mirror those done during the regular day to ensure consistency.

Staff receive extensive safety training during their annual summer staff training and initial training (within 30 days of a new hire), which includes 20 hours of safety instruction on 13 topics ranging from child abuse prevention and risk management and first aid/CPR to blood-borne pathogen training.

Parents receive information about safety procedures in a Back to School packet at the beginning of each school year. Each family completes a health history form upon enrollment and Y staff review the forms for the children in their group. All staff are aware of individual students' significant health issues such as allergies, asthma, and diabetes. All staff are also aware of particular children's medication needs. All medications are locked up (unless they are lifesaving like an epi-pen or inhaler - then staff carry them in a first aid fanny pack on their hip) and strictly administered and documented according to parent instructions. If a child has a disability or special need, Y staff are included in the school IEP and are trained to meet the specific needs of the child. Y staff will also receive training on trauma-informed services to help better serve our youth from a healing perspective.

Staff wear uniforms and name badges so they are easily identifiable to children, families, and school personnel. Students are signed in and out each day. Attendance is taken at the beginning of the program and all students who are expected to attend are accounted for by their leader. Over the course of the program, staff account for the students in their group so they know where they are at all times (students are signed in and out for parallel programs as well). Staff escort students to the restrooms in strict accordance with our bathroom policies. All leaders have emergency information for the students in their group in case of an emergency both on campus and during field trips. Parents sign their children out at the end of the day.

After School Education and Safety Program Plan Guide

Our ASPs follow district and department protocol for handling student incidents and maintain a record of student incidents and accidents with written reports and phone records. These documents are shared with instructional day staff as well as with families. Program staff have on site files that contain contact information for emergency responders in the district and local community. The Site Director carries all principal and key district administrator cell phone information, and contacts them in the event of emergencies and as soon as the immediate safety of the children are secured.

- Describe how the program will provide a safe and supportive environment that provides for the developmental, social-emotional, and physical needs of students.

With a focus on our core values of caring, honesty, respect and responsibility, students are given “voice and choice,” the opportunity to give input in their program and this includes curriculum based on their interests. The YMCA has a strong relationship with each of the school administrators and teachers who also give their input about core day academic alignment with the after school activities. Youth will have opportunities to:

- Build Program content
- Practice and understand safety measures that are aligned with the school day
- Provide programming that is fun and engaging for the students.

The YMCA works with our school administration to provide a positive school climate. Each small group of students is grouped up by grade level and we ensure age appropriate curriculum all grade levels include moderate to vigorous activity daily. We partner with Apperson Evo for a social emotional learning assessment (DESSA) in order to track student engagement, set goals, identify school needs and track progress toward improvement. Projects and activities are then utilized to target areas of social emotional learning that meet students’ needs and help build healthy relationships, goal-directed behavior, personal responsibility, decision making skills, self-awareness, social awareness, and optimistic thinking.

All YMCA staff are trained in classroom management, appropriate discipline measures, and creating emotional environments that are caring and have high expectations for each student. Students work with staff to create their group norms/agreements at the beginning of the year. These agreements are visible in each classroom and the staff and students continuously work together to create a positive environment. Project Cornerstone, a YMCA led collaborative working for positive youth development in Santa Clara County, provides anti-bullying workshops for students and staff to help create a caring school climate with zero tolerance for bullying. Clear rules, consistent with the school day, are enforced by Y staff in partnership with school day staff. A behavior guidance policy is in place, where parents/caregivers and students are oriented with and understand consequences for their behavior.

Further, our program aligns with the 40 developmental assets identified by the Search Institute as supporting positive youth development. Staff are explicitly trained to

After School Education and Safety Program Plan Guide

understand the developmental stages of children in grades TK-8 and to provide activities and relationships that support youth development such as School Engagement; Caring School Climate; Relationships with Caring Adults; Relationships with Peers; Self-Esteem; Sense of Purpose; Planning and Decision Making; Peaceful Conflict Resolution; Cultural Competence; and Sense of Belonging.

While staff are trained in the developmental stages of school-age children, they also work closely with families and the schools to understand the unique developmental stages and needs of each child. Curriculum and activities are planned by grade level to address general developmental stages and customized to address individual needs in delivery and content.

2—Active and Engaged Learning

- Provide examples of best practices, including research or evidence-based practices that were used to guide the planning of educational literacy and educational enrichment activities that will align with the regular school day to enhance academic performance achievement and positive youth development.
- Describe the planned program activities and how they will:
 - a. Provide positive youth development.
 - b. Provide hands-on, project-based learning that will result in culminating products or events.
- If applicable, explain how the planned program activities are based on the school and community needs for a summer supplemental program.

Alignment with the Common Core Standards is pivotal to program design. The Educational and Literacy Element contains a combination of school district curricula and certified aligned after school curriculum products such as Social Emotional Learning through Apperson Evo, Mixing in Math, and CATCH (Coordinated Approach to Childhood Health.) In addition, the ASES program wraps around and coordinates with existing supplemental educational programs at each school site, such as extended day intervention and enrichment programs. Students who enroll in the ASES program and receive extended day instruction continue this assistance as part of the comprehensive program. Homework assistance is a daily component of the program. YMCA staff is trained in providing effective support and assistance to children in working through assignments. In addition, the program hires a teacher liaison to support academic alignment to the school day.

The YMCA uses the Weikart Center's research-based improvement system to help youth programs set meaningful improvement goals based on data, enact new practices, and create powerful developmental environments for youth. Weikart uses a program quality assessment which YMCA staff conduct during the fall. Based off of the needs of each site Weikart provides specific focuses which includes these nine areas:

After School Education and Safety Program Plan Guide

1. Structure and Clear limits
2. Homework Help
3. Youth Voice
4. Planning and Reflection
5. Building Community
6. Cooperative Learning
7. Active Learning
8. Ask, Listen, Encourage
9. Reframing Conflict

The district and the YMCA are committed to health, fitness and wellness for students and their families. The district leverages YMCA experience in this area to provide safety around water, family nights at the YMCA, group exercise classes, youth sports teams and performing arts. Youth development includes character education, service learning and a constant focus on creating positive relationships among program participants and staff. Guest speakers focus on issues of aspirations and goal setting, respecting diversity, conflict resolution and career goal setting. Creative enrichment includes a variety of arts/crafts activities as well as classes in performing arts, culinary, and/or gardening. Club programs integrate the interests of the youth and include hip hop dance, chess, photography, journalism, girls' image, and many different types of sports.

Overall, after school activities are planned and implemented to meet both long-standing and evolving needs identified by students, school staff, and families. These include:

- Academic support in core subjects through small group, differentiated instruction facilitated at the school site, by YMCA After School Leaders, to meet identified needs for kids who are not at grade level academically, and the schools' needs to bring students up to grade level. (Daily, 30-45 minutes)
- Academic enrichment through STEM, and digital arts, to address needs for student engagement and meaning-making, to spark curiosity, and enable students to develop skills mastery. (Weekly, 30-45 minutes)
- Healthy eating and physical activity, including CATCH, activity clubs, dance, sports, and nutrition education to combat childhood obesity and develop life-long healthy habits. (Daily 30 minutes)
- Youth development activities: project-based learning for skill-building, teamwork, and leadership development; college and career exploration to meet needs for students to have positive goals for their future; and leadership development, to address students' needs to make a difference, to have voice, to belong, and to practice exercising responsibility.
- Social Responsibility activities such as service learning projects (1x/quarter), multicultural arts activities and performances, global learning and cultural exploration, to meet the community's need for culturally aware and competent citizens.
- Parent/Caregiver engagement through quarterly events and volunteer opportunities, e.g. family events, parent training, and connecting parents to other parents, to meet students' needs for family support and promote

After School Education and Safety Program Plan Guide

families' participation.

Our programming is designed to be intentional while providing structure to engage students academically and get them to grade level.

Rocketship does not obtain ASES Summer Supplemental funding and the YMCA continues their efforts into the summer with our Summer Learning Programs.

One example of program activities that have evolved in response to widespread need and our efforts to address food insecurity among families at our ASPs. As we learned from our line staff and school partners that families were struggling with access to fresh produce and other basics, the Y developed partnerships with farmers' markets, food distribution networks, school and community garden projects, and CalFresh providers to help families eat better. Together we support snack/meal programs to ensure that our ASP participants eat a full, nutritionally fortified meal every school day.

We constantly assess student needs through formal and informal feedback systems (many described below) that include surveys, social-emotional assessments (DESSA), youth voice and choice conversations, on-going school-site staff conversations, and PQA stakeholder conversations. We use findings to refine programming on an ongoing basis.

3—Skill Building

- Describe how the program educational literacy and educational enrichment activities are expected to contribute to the improvement of student academic achievement as well as overall student success.
- Explain how the planned program activities are based on the school and community needs for a before school, after school and/or supplemental program.

YMCA staff work closely together with school day administration and teachers to create a bridge between the school day and out of school time for those students who need additional support. The school administration and teachers work hand in hand with the YMCA to ensure that out of school enrichment activities are tied to the school day curriculum.

The YMCA provides homework support and small group or one on one assistance for those students with an IEP or who are identified as having special learning circumstances.

Our programs use the “4c’s: collaboration, communication, critical thinking, and creativity,” to teach 21st Century skills throughout our project-based learning in all areas. Staff develop activities using the SAFE lesson planning tool, laying out Sequenced, Active, Focused, and Explicit Learning goals, and communicate those goals to students. Staff explain the activity step-by-step and how it builds on other activities; they create activities that require hands-on engagement; they demonstrate

After School Education and Safety Program Plan Guide

and practice skills with youth; and they focus specific time and attention on skill development. Each activity also includes observation and reflection on the learning objective and skills learned.

In addition to our STEM programs, our entire curriculum is built around teaching and promoting 21st Century skills. As mentioned above, our after school clubs hold culminating events presented to the school and/or parents, such as drama, dance, and music performances and forums in which participants share their experiences and teach other students the skills they have learned. Through academic enrichment and clubs, lessons build on one another, leading to students' development and mastery of hard and soft skills.

4—Youth Voice and Leadership

- Describe how student feedback, assessments, evaluations, and integration with the instructional day will be used to guide the development of training, curricula, and projects that will meet students' needs and interests.

Active student engagement is the cornerstone of a strong youth development program, and the Y embeds the following youth development principles into every activity: (1) youth are valued and encouraged to bring their assets to the table; (2) adults and youth work in partnership and youth are active agents in the program; (3) youth attend, participate, contribute, and lead through positive youth development activities; and (4) youth contribute through service to their communities. We create these supports and opportunities throughout all Y programs.

Youth experiences and their leadership are valued. Leadership opportunities for all youth; not just presumed "leaders" are available. Students take an active role in managing their own time and learning as well as engage in opportunities to shape programs through scaffolding, designation of roles and responsibilities. Staff provides support and safety for student decisions and leadership roles.

Staff are trained to assess the quality of the learning environment in our after-school and summer learning programs by utilizing the Weikart Youth Program Quality Assessment (PQA) tool (discussed in more depth in Section 10). Program staff learns to identify and act on opportunities for youth involvement and voice in all activities, such as creating community agreements and having students function as line leaders, supply monitors, physical activity leaders, timekeepers, recorders, and more. The goal of youth involvement and leadership is ultimately youth ownership of the program and an opportunity to develop and enhance their skills and competencies

- Describe the opportunities provided to students where they can share their viewpoints, concerns, or interests (i.e., student advisory group) that will impact program practices, curricula, or policies, including opportunities for student leadership.

After School Education and Safety Program Plan Guide

We promote student leadership or Leaders in Training (LIT), who propose, plan, and lead club activities, cross-age tutoring, health presentations, and service learning projects. LITs, with staff guidance, help other students brainstorm activity ideas and vote for clubs. They present and role model content to younger students around core values of caring, honesty, respect, and responsibility. LITs also help set up and deliver lessons alongside staff members.

LITs provide ongoing leadership to the programs. They also help set up and deliver lessons both alongside staff members and on their own under staff supervision. They contribute freely to planning activities and provide feedback to the program and have many times influenced schedules (e.g. physical activity before homework), curricula, snack, activity implementation, and after school climate. With the confidence they build as student leaders in after school, some LITs have also influenced policy and practice during the school day around school lunch menus and caring school climates.

- Describe how students in lower grades will be able to make choices when participating in program activities, and how students in higher grades will actively exercise their leadership skills by addressing real world problems that they identify in their communities (e.g., service learning).

As part of our commitment to positive youth development, our program structures clubs and activities so that students in lower grades are able to make choices based on their interests and strengths. Students provide feedback to staff, to LITs, and to each other on topics or interests for activities and clubs. Once we have their interests, we plan curriculum and activities. We expect and encourage all students to take an active role in choosing which enrichment activities they want to participate in. Enrichment choices vary each semester, so students are able to explore a wide range of options over time. We have found that giving students the opportunity to explore their interests while learning new skills increases their engagement and overall satisfaction in the program. Students in lower grades have opportunities to exercise their powers of choice by voting for activities, themes, and ideas for events, projects, and summer field trips; exercising choices among different activities when two or more are planned; and completing surveys about the program to share their ideas and voice.

We believe that service learning is an excellent opportunity that promotes leadership, teamwork, and connection to the community, building critical developmental assets. After school students identify needs in their community and engage in reflection and evaluation of the projects that then inform future projects locally, nationally or globally. Some examples of service learning projects older students in our after-school program are Second Harvest's Food Drive, which provides food for families and community; school site cleanups; and creating care packages for homeless shelters.

5—Healthy Choices and Behaviors

- Describe the types of healthy practices and program activities that will be aligned with the school wellness plan.

After School Education and Safety Program Plan Guide

The after school program at Rocketship aligns with Rocketship Education's Local School Wellness Policy.

Rocketship Public Schools ("Rocketship") is committed to the optimal development of every student. Rocketship believes that for students to have the opportunity to achieve personal, academic, developmental, and social success, we need to create positive, safe, and health-promoting learning environments at every level, in every setting, throughout the school year.

Research shows that both good nutrition and physical activity— before, during, and after the school day—are strongly correlated with positive student outcomes. In accordance with the requirements of the federal Healthy, Hunger-Free Kids Act of 2010 (HHFKA, 7 C.F.R. parts 210 and 220) and the California Education Code, this policy outlines Rocketship's approach to ensuring environments and opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. Specifically, this policy establishes goals and procedures to ensure that:

- Rocketship students have access to healthy foods throughout the school day - both through reimbursable school meals and other foods available throughout the school campus- in accordance with Federal and state nutrition standards;
- Students receive quality nutrition education that helps them develop lifelong healthy eating behaviors;
- Students have opportunities to be physically active before, during and after school;
- Schools engage in nutrition and physical activity promotion and other activities that promote student wellness;
- School staff are encouraged and supported to practice healthy nutrition and physical activity behaviors in and out of school;
- The community is engaged in supporting the work of Rocketship in creating continuity between school and other settings for students and staff to practice lifelong healthy habits; and
- Rocketship establishes and maintains an infrastructure for management, oversight, implementation, communication about and monitoring of the policy and its established goals and objectives.

This Local School Wellness Policy (LSWP) applies to all students, staff and schools in the Rocketship network. Specific measurable goals and outcomes are identified within each section this link here for more details: https://drive.google.com/file/d/1j1ABHhP8h4_bxnzPAZX7WKCxMYpThsJ4/view

Our program is committed to teaching lifelong fitness and wellness for participants and their families through our structured recreation and health and wellness components. We use the research-based CATCH, USDA's Harvest of the Month and curriculum supplemented by YMCA to engage kids in nutrition and health education.

After School Education and Safety Program Plan Guide

Physical activity is a priority in our after school program. Children participate in moderate to vigorous physical activities, for at least 30 minutes daily, which help them develop physical activity habits to promote their health throughout their lives. Participating in team sports and group games supports students' skills, movement knowledge, social and interpersonal skills. We leverage our collective health and wellness expertise by providing programs such as swim instruction, family nights, yoga, Zumba, and youth sports teams.

We collaborate with a number of agencies to support our focus on healthy living for all of our kids and families:

- The Santa Clara County Public Health Department provides training, curriculum, and family health education resources, and funding for childhood obesity prevention activities. Examples include the CATCH Training (Coordinated Approach to Child Health)
- Second Harvest Food Bank provides resources promoting CalFresh (SNAP) enrollment for eligible families.
- Nutrition Services provides healthy snacks and meals for students through the USDA, Child and Adult Food Care Program (CACFP reimbursement for meals) and NSLP snack program. Options include items such as string cheese, variety of fresh fruit and vegetables, whole grain snacks, yogurt, milk, and sun butter sandwiches, wraps and more.

6—Diversity, Access, and Equity

- Describe how the program will create an environment that promotes diversity and provides activities and opportunities to celebrate students' cultural and unique backgrounds.

Developmental Asset #41, identified by local input in Santa Clara County, facilitated by Project Cornerstone and initiative of the YMCA of Silicon Valley, promotes "Positive Cultural Identity," where youth feels comfortable with and proud of their identity, including but not limited to ability status, body size, ethnicity, faith/religion, family status, gender, gender expression, gender identity, immigration status, language, race, and sexual orientation. Asset #41 is infused into many aspects of programming through conversation, teachable moments and intentional sharing. Staff training includes ongoing training in cultural diversity and inclusion, participation in the annual Inclusion Collaborative State Conference, and bringing back and sharing learning from the conference in ongoing staff development.

Global learning is a key program component of the after school, engaging participants in an exploration of their own and others' cultures. Students lead clubs and activities related to their cultures as well, including teaching and leading games like cricket and soccer. Through these experiences, students learn to recognize and articulate various perspectives, and communicate their ideas respectfully.

After School Education and Safety Program Plan Guide

Our STEM initiative is also very intentional about communicating with our students that women, Latinos, and African Americans can enter and succeed in scientific, technical, and engineering fields. We make a point of introducing students to people in these fields who reflect the heritage and culture of our students.

- Describe how the program will reach out and provide support to students with disabilities, English language learners, and other students who have potential barriers to participate in the program

The Y takes diversity, equity, and inclusion seriously. We are known for our inclusion practices. Our directors are trained on inclusion and more importantly, have an inclusive mindset. We work with teachers to identify students who would benefit from our inclusive programming.

Students come to our program from a wide variety of backgrounds. Explicit engagement of families and students through designated events (i.e. family nights, parent workshops & routine student progress check-in's) is made a priority. Flyers and/or meetings are available in multiple languages and when language poses a barrier an interpreter is sought.

When students with special needs are enrolled in the program, the Y staff work closely with the school and parents to be partners in their Individualized Education Plan or 504 Plan and train other site staff on the specific disability or need. All activities are adapted to allow for full inclusion whatever the potential barrier to participation might be, and the staff to student ratio is adjusted to meet specific needs. Our programs are on campus which are physically accessible to students and families who use assistive devices.

Further, the Y's practice of hiring staff who reflect the cultural and linguistic diversity of our families helps ensure that English Language Learners have equitable access to curriculum and activities. We continue to recruit and train, high quality, bilingual and cultural workforce that represents the school's demographics. This helps us ensure engagement of our students and community.

Other examples of potential barriers to participation include language, program hours, and understanding of the purpose of the program, transportation, poor school day attendance, medical conditions, and students caring for younger siblings at home. To encourage and facilitate participation, our multilingual, culturally competent staff teams communicate with families in their home language and culture. Because many families walk to school and from school, we have to make special early release accommodations for walking youth and families during the winter months. Our early release policies reflect this accommodation. Sometimes there are greater challenges such as medical, housing, and child care issues. We provide resources to families in these areas to help them address these larger, more systemic issues.

After School Education and Safety Program Plan Guide

7—Quality Staff

- Describe how the program’s administrators will ensure that all staff who directly supervise pupils meet the minimum requirements of an instructional aide.
- Describe the planned recruitment and hiring process for staff and how their experience, knowledge, and interests will be considered.
- Describe the type and schedule for the continuous professional development that will be provided to staff.
- Provide descriptions of the services provided by sub-contractors, if applicable. An organizational chart is recommended.

All leadership/school site staff are required to have prior experience working with children; curriculum interests and expertise; cultural competency, and sensitivity to linguistic, gender, and class differences and an understanding of poverty’s impact on education. Rocketship’s minimum qualification for an instructional aide is a high school diploma. Many ASP staff are members of the communities they serve and fluent in students’ home languages, including Spanish, Mandarin, Cantonese, Tagalog and Vietnamese. Site Directors must demonstrate supervisory ability and experience working for complex organizations.

Instructional aides must have equivalent to high school graduation. Fingerprinting is done through the YMCA .

Staff are recruited by the YMCA through various methods including website postings, school community postings and local State and Community Colleges in the Education and recreation departments. Staff have a comprehensive training plan that is managed by the YMCA , staff attend Region 5 training and other YMCA and district wide training. Oversight and accountability on the YMCA side includes an administrative staff member that works directly with the district staff on broader Region 5 and after school issues. At the local level, the YMCA has a program manager that oversees all the programs in the district and works directly with the district ASES manager to ensure reports are submitted. The YMCA program manager is on school campuses on a regular basis, providing feedback to the site/unit directors or working directly with the students, supervising leaders and coordinating with the school site staff to manage the program. All staff meet the minimum requirements for the school district aide. Staff personnel checks, including DOJ and FBI, are on file at the YMCA Association office.

The YMCA provide a number of staff development opportunities. Each year, staff attend over 40 hours of professional development, over and above staff meetings. Some trainings are mandatory for all staff (e.g. Child Protection Training, First Aid and CPR, Classroom management, Curriculum planning, Behavior Guidance, Health and Wellness programming (physical activity and Nutrition Education), working with families, Developing and Nurturing School Relationships, Child Development) and specific

After School Education and Safety Program Plan Guide

trainings are scheduled based on staff need. Staff online and in person conferences such as the Region 5 and YMCA conference where they choose topics they might be interested in.

Ongoing all-staff Youth Program Quality Improvement Trainings using the Weikart trainings focus on active-participatory approaches; active listening; ask-listen-encourage frameworks; building community and cooperative learning; homework assistance; planning and reflection; reframing conflict; structure and clear limits guidelines; and empowering youth voices. Staff receive training regarding grant requirements such as attendance and safety. Site Directors receive regular information and guidance on budgets and how to allocate funds to maximize the efficacy of the program.

Weekly staff meetings include both training and troubleshooting components. Monthly system-wide Site Director Meetings focus on sharing strengths and problem-solving. Our Directors are trained in coaching and mentoring, performance management, strategic decision making, high performance accountability, and member engagement.

We also use formal program evaluation as a training opportunity and in performance reviews. Y leadership visits each program at least twice per year and conduct extensive evaluations, followed by written reports and debriefs with Site and Program Directors. Each site's Program Quality Improvement Plan helps to inform staff development, supporting strengths and addressing improvements needed. The plans also provide opportunities for participants, instructional day staff, ASP/SLP staff, and families to provide feedback on the quality of staff and volunteers. Oral and written evaluations are used as a training tool for continuous program improvement. All staff receive frequent informal performance evaluations and annual performance merit reviews from their supervisors. Program evaluation data is considered in all reviews.

We also firmly believe in the 10-30-60 rule for professional development and learning. 10% of development is attending training, 30% is quality coaching and mentoring, and 60% is on-the-job training and experiences with quality supervision. Our Site Directors are trained in coaching for performance and their role is planned to be in the field, so they can provide immediate feedback, coaching, and role modeling to line staff on an ongoing basis.

The YMCA does not subcontract any services for this site.

8—Clear Vision, Mission, and Purpose

- Describe how the needs of the community, students, parents, and school were identified (i.e., assessment scores, number of students performing academically below grade level, school and community safety data, attendance and truancy rates, and juvenile crime rates, etc.), the resources available, and how those needs will be addressed.

After School Education and Safety Program Plan Guide

- Describe three to five program goals developed from the results of the needs assessment and how data will be collected to evaluate whether program goals are being met.
- Describe how the program has engaged or will engage stakeholders (i.e., principal, instructional day teachers and other instructional day staff, families, students, program staff, community members, and other community partners) in the creation of the program's mission, vision, goals, and expected outcomes based on the needs of the specific community.
- Describe how the needs of the community, students, parents, and school were identified (i.e. assessment scores, number of students performing academically below grade level, school and community safety data, attendance and truancy rates, and juvenile crime rates, etc.), the resources available, and how those needs will be addressed.

The Rocketship, as the Program Grantee works in conjunction with the YMCA , uses a variety of data points to assess stakeholder need in determining after-school programming. This data includes free and reduced price meal eligibility, student proficiency from local performance assessments, student suspension and expulsion rates, attendance rates and teacher/principal referral.

How needs were identified: The Y has intimate knowledge of the targeted school communities through our on-the-ground presence since 1998, ongoing collection of student and family needs data (including input from schools, parents, and children), and our broad network of partnerships. We reviewed data on student demographics, achievement, absenteeism, parents' educational attainment, and from California Healthy Kids Surveys (CHKS), California Physical Fitness Test and other evaluation instruments developed both nationally (e.g., National Youth Outcomes Initiative) and locally. Our assessments have also been informed by the Y's ongoing participation in the Santa Clara County After School Collaborative, SJ Learns and Shortino Foundation Community of Practice (CoP), State of the Schools Address, READY to Soar Campaign for 3rd Grade Level Reading, Project Cornerstone Developmental Assets Collaborative, County Public Health Department and Santa Clara County Office of Education Covid-19 Designee Meetings, conferences, school board meetings and the local planning council.

- Describe 3-5 program goals developed from the results of the needs assessment and how will data be collected to evaluate whether program goals are being met.

Students need support beyond what they receive at home and during the school day to be able to become proficient in core academic skills and build on their social and emotional well-being and physical health. In the US, 1 out of 3 adults and 1 out of 4 children are overweight or obese. The after school program provides an opportunity to enrich the whole child in mind, spirit and body. The after school program provides enriching activities that promote their social-emotional and overall development and

After School Education and Safety Program Plan Guide

readiness to learn. Daily physical activity encourages students to develop healthy life-long habits. Students will be surveyed to assess their attitudes and beliefs around healthy living.

Without the school-based ASPs, students would lack access to these opportunities. Most of their families could not afford the fee-based programs that exist in their communities. Importantly, the Y's programs also meet families' needs for their children to be safe and supervised after-school and during the summer.

Students are identified by school day teachers who are below grade level in reading, math or may need additional support in the form of having a sense of belonging, opportunities to make friends or have the support of caring adult role models.

- Describe how the program has engaged or will engage stakeholders (i.e., Principal, instructional day teachers and other instructional day staff, families, students, program staff, community members, and other community partners) in the creation of the program's mission, vision, goals, and expected outcomes based on the needs of the specific community.

We work collaboratively with each of our team at Rocketship to ensure that the YMCA vision, mission, and strategies are aligned to the district and schools' strategic plans and objectives to create a comprehensive and integrated ASP/SLP vision and mission. We assist the district in meeting their objectives for social emotional learning, family-school relationships, collaboration with public agencies and community-based organizations, enriched learning environments, and staff development, among others.

We have a wide range of partners, including the Santa Clara County After School Collaborative, the Project Cornerstone Developmental Assets Collaborative, and the Santa Clara County Public Health Department Cooperative. Our ongoing meetings and discussions with practitioners in education, public health, and youth development help us to formulate our strategies, in alignment with the national YMCA vision and mission for out of school time programs, and for healthy, thriving families. We attend school board meetings, and other convening within each district. In addition, Santa Clara County Office of Education provides data, research, and policy insights to help frame our goals and expected outcomes.

The YMCA engages and welcomes key stakeholders from the school to work in collaboration with YMCA staff to identify areas of focus. The Youth Program Quality Assessment (PQA) and several extensions (STEM, Arts, Academic Climate, SEL, Health and Wellness) were designed to assess the quality of learning environments and to identify staff training needs.

Goals identified in the program plan will be evaluated and measured through student, parent and school surveys, site visit observations, attendance data and regular meetings between the school leaders and the after school program as well as district leaders and staff from the YMCA . Our Rocketship Public School Extended Learning

After School Education and Safety Program Plan Guide

Team, connects with, visits and meets with after school program staff regularly ensuring collaboration, connection and alignment with goals outlined in our Program Plan.

9—Collaborative Partnerships

- Describe the collaborative partners that will be involved in the process used to plan, implement and update the after school program plan.

Key partners in the planning, and implementation and monitoring of the after school program are the Rocketship team and the YMCA teams. The school site principals work with our teams to ensure the program is operating in alignment with the school day and school expectations. To ensure that after school staff are aware of school and curricular events and that the school staff are aware of ASES program happenings and events we host weekly meetings and opportunity to plan ahead of time. Communication between the YMCA after school programs and the regular school day program staff and administrators is facilitated through the site director. The site director is on campus minimum of 6 hours per day, 5 days per week. The site director is treated as a member of the school staff, attending staff meetings on a regular basis. Our experience demonstrates that this highly effective strategy optimizes communication with school staff.

Collaboration is maintained on multiple levels. At the school site level, the YMCA site director meets regularly with the Associate and Senior Associate Directors of Extended Learning, classroom teachers, principals and specialized school site staff (resource teachers, counselors, etc.) and the parents to ensure that each site's program is effectively addressing the needs of the students, parents and school day meetings. The YMCA staff work with the school staff on program implementation, resources and sustainability. At the county wide level, all programs are part of the Santa Clara County After School Collaborative, an organization representing lead agencies, school districts, and after school provides. The collaborative meets the first Wednesday of every month (September-June) to share resources and best practices, attend joint training sessions and engage in sustainable workforce planning.

Continued relationship with key stakeholders exists due to a two way communication throughout the year. Not just during the school year but year round. This consists of communication face to face, via email. The district is constantly working with partners to ensure that the needs of the school communities are met. The After School Director, BOM/OM (Business Office Manager, Office Manager), Associate Director of Extended Learning, Senior Associate Director of Extended Learning, and other school staff stay in constant communication to align the after school program to Rocketship culture and school day activities. Rocketship engages all extended learning staff to participate in training prior to school year starting and also during school year in-service days. Rocketship online training is also available to after school staff.

After School Education and Safety Program Plan Guide

Goals identified in the program plan will be evaluated and measured through student, parent and school surveys, site visit observations, attendance data and regular meetings between the school leaders and the after school program as well as district leaders and staff from the YMCA . Our Rocketship Public School Extended Learning Team, connects with, visits and meets with after school program staff regularly ensuring collaboration, connection and alignment with goals outlined in our Program Plan.

- List and describe at least 3-5 collaborative members, including any specific duties/responsibilities or contributions (e.g., Memorandums of Understanding, service providers, in-kind, etc.).

We provide students with enriching and impactful programming by leveraging the expertise and resources of our extensive network of government, non-profit, community, and corporate partners, including:

- Santa Clara County After School Collaborative. The Y is one of the three founders and current leaders of this county-wide collaborative, which brings together diverse after school providers and allied organizations to work on the four common goals of high quality programs, well-trained staff, advocacy, and sustainable collaboration. Typically, 25 organizations (including the Y) participate in the collaborative monthly meetings which focus on sharing resources and after school best practices, providing professional development opportunities, and organizing advocacy efforts at the city, county, and state levels.
- Project Cornerstone. The Y is the home agency and founding member of this county-wide collaborative that works to build a web of support around young people so that they grow into healthy, caring, and responsible adults. Project Cornerstone’s more than 400 schools and community, business, and government partners work to change personal behaviors of adults, strengthen programs that serve youth, and impact public policy. The collaborative mobilizes adult volunteers to work in school literacy programs; Middle School Clubs that engage parents in school activities; Expect Respect, a bullying prevention program; Take It Personally, a 6-week training to educate and inspire adults to support youth in all aspects of their lives; and ongoing school staff training and consulting to help teachers, administrators, and other school employees identify opportunities to connect with youth and identify and interrupt bullying.
- Region 5 After School Partnerships. This partnership focuses on building the capacity of potential and existing ASES and 21st CCLC grantees to develop, implement, and sustain compliant and high quality after school and summer programs. COOs, Mary Hoshiko Haughey (YMCA), have been members of Region 5’s Advisory Board for the last five years. The Board provides input from educators and service providers regarding training and technical assistance needs and resources for school-linked services and after school programs.

After School Education and Safety Program Plan Guide

- Identify any potential collaboration and partnerships that would be of benefit to the after school program and describe your efforts to include them.

The Y believes in the power of community partnership and collaboration to improve the health and wellbeing of individuals and families. For years, we have been at the forefront of network and partnership building in Silicon Valley and are a leader in the region in promoting quality measurement and developing culturally appropriate and academically rigorous after school.

Together, we seek to deepen our relationship with current partners including Mission College, Santa Clara University and San Jose State University.

10—Continuous Quality Improvement

- Describe how the program will engage in a data-driven CQI process (i.e., assess program quality, plan, and improve program quality) based on the *Quality Standards for Expanded Learning in California*, available on the After School Network web page at (<http://www.afterschoolnetwork.org/post/quality-standards-expanded-learning-california>). Include timelines, roles of staff and other stakeholders, and how the results of the assessment(s) will help refine, improve, and strengthen the program.

Please visit the CDE’s Guidelines for a Quality Improvement Process web page at <https://www.cde.ca.gov/ls/ex/cqiguide.asp>.

The Quality Standards for Expanded Learning serve as our “North Star.” We will use the Weikart Youth PQA instrument to evaluate quality in addition to regular “Quick Checks.” The CQI plan reinforces the Quality Standards for Expanded Learning through the “Plan, Assess and Improve Process.” The cadence for evaluation is as follows: Quick Checks take place on a weekly basis and involve the Site Director, Program Director and designated Rocketship staff. The formal Program Quality Assessment that includes key stakeholders begins in October and results in establishing site specific programmatic goals for the year that are reviewed in December and January. The Spring PQA process begins again in February with additional goals established in March through the end of the school year. Quick checks, informal site visits will also inform goal setting and refine actions that support the Quality Standards for Expanded Learning.

Y ASP leadership examines our program activities annually, vis-a-vis identified needs, in collaboration with our co-applicant districts; families, partners, and students. We set performance measures for after school that align with the instructional day and participants’ academic needs as follows:

- Improve academic achievement (state requirement): 60% of students will either increase their achievement levels or if already performing at proficiency or above, maintain their performance levels
- Improve literacy levels: 80% of students will improve literacy levels

After School Education and Safety Program Plan Guide

- Improve school day attendance (state requirement): 85% of students will attend program more than 90% of possible program days (after school and summer learning)
- Developmental Assets (e.g. character development): 90% of participants will (1) demonstrate values (2) make new friends and (3) have positive adult role models (90%)
- Improve healthy eating: 85% of participants will improve their eating habits
- Improve physical activity: 90% will improve physical activity levels
- Safe environment (physical, socio-emotional, cyber safety): 80% will report feeling safe
- Strengthen fiscal outcomes/efficiency ratio: Program efficiency ratio increases year to year while meeting fundraising goals

To evaluate our after school and summer programs, we collect data on program activities, participation levels, staffing, academic improvement based on district assessments and state standardized tests, social emotional skills, and indicators of student, parent, and teacher perceptions of the program's benefits and effectiveness. In line with the strategic objectives, we also examine measures of youth development, healthy living, and social responsibility.

For data collection, we use student and parent attendance logs, school records and databases, and parent, student, and school surveys. End of the year survey results are assessed and used to help plan the academic support and enrichment activities for the following school year.

Our ASP staff works closely and consistently with school-day staff. Communication between after school program staff and school day staff and administrators is facilitated through the Site Director and works closely with the school to address individual students' specific needs. Working closely with Associate and Senior Associate Directors of Extended Learning we deepen our ability to connect the after school program with the school day. With this constant communication, our after school staff receive regular input on how best to develop activities and curricula based on student academic assessments.

- Describe how (i.e., methods and frequency) the program will engage in a data-driven CQI process (i.e., assess program quality, plan, improve program quality) based on the *Quality Standards for Expanded Learning in California* available on the After School Network Web page at (<http://www.afterschoolnetwork.org/post/quality-standards-expanded-learning-california>). Include timelines, roles of staff and other stakeholders, and how the results of the assessment(s) will help refine, improve, and strengthen the program.

Please visit the CDE's Guidelines for a Quality Improvement Process Web page at <http://www.cde.ca.gov/ls/ba/as/implemetation.asp>.

Program improvement is ongoing at the Y and an important part of achieving our overarching strategic plan goals as well as strengthening our after school and summer

After School Education and Safety Program Plan Guide

programming. The Y is a leader in quality programming throughout Silicon Valley and sees assessment, planning, and improvement as necessary components of impactful work.

We will conduct annual program quality assessments (PQA) at all of our sites using the Weikart Youth PQA instrument, which is designed to assess the quality of learning environments and to identify staff training needs. All the sites will develop Program Quality Improvement (PQI) plans, including adding key areas of need identified in the PQA to our goals and listing clear steps and benchmarks for determining success. Based upon the results of the quality assessment, we will offer training and resources to our staff to manage improvement, including Weikart's Youth Work Methods training that align with our completed PQA and our in-progress PQI plan. We will continue to regularly reassess the needs of the program to ensure continuous quality improvement.

Timeline and stakeholder roles: Our program conducts the PQA within the first two months from the first day of school, using the Weikart Youth PQA tool. We engage multiple stakeholders in this assessment process, including program staff, parents, youth, and teachers. Program staff observe program activities and conduct interviews with program administrators. Parents and teachers also observe program activities and provide feedback. Notes, observations, and interview data are compiled and used as evidence to score items on the Weikart Youth PQA scale. Next, scores are combined for an overall quality profile, and then identifying several high priority needs to focus on in the overall program PQI planning process takes place.

During the initial planning process in October and November, teams comprised of the Site Director, principal, and designee teachers, parents, district staff members, and staff, who work together to create an action plan related to one or two high priority areas and review and comment on the draft plan.

To monitor progress and reassess action steps, the site team meets every month. Further, the Program Director monitors progress on a bi-weekly basis by meeting with the Site Director and reviewing individual action steps on the plan. Discussions on assessment data are held the school site PQI team, Program Directors, Site Directors, school administration, and key stakeholders. The YMCA's Program Directors and the Site Directors examine data to guide changes in policy, procedures, program design and instructional strategies. Together, they ensure that after school and school staff, parents, and students are consulted about ways to refine the program so that it yields maximum benefit to the students and their families. We use evaluation data to facilitate decisions about program improvements; refine program goals and objectives; identify successful program components for adoption and dissemination; and plan for program sustainability. We also uses evaluation results in all staff performance reviews throughout the organization. In addition to CDE and other stakeholders, audiences for our evaluative work include our families and community at large; practitioners with an interest in after/before school and summer programs; attendees at regional conferences; and current and prospective funders.

After School Education and Safety Program Plan Guide

We have a dedicated staff who works directly with the CDE, to manage the ASP FPM. This staff member directly loads documents for document review and responds to questions and comments from the CDE FPM auditor in collaboration with stakeholders.

11—Program Management

- Describe how the program funding will relate to the program vision, mission, and goals for each site or groups of sites.
 - Site Director: Oversees all program staff; facilitates communication with the principal, instructional day teachers, and other school staff. The Site Director duties include providing opportunities to coach and mentor staff in effective program delivery and behavior guidance strategies. The Site Director is also responsible for the overall program planning and curriculum and risk management and safety. The Site Director attends all regular school site meetings. See question 11.3 below for further information on the Site Director’s role as liaison with the school day at each site.
 - Trained After School Staff: Reports to Site Director. All after-school-site staff must meet the district’s Instructional Aide requirements and have experience and a desire to work with middle school youth, and have curriculum interests and expertise and cultural competency, including sensitivity to linguistic, gender, and class differences and an understanding of poverty’s impact on education. Many staff are members of the community they serve. Line staff are assigned a group by grade for the year. Line staff are responsible for leading academic assistance and enrichment activities, building relationships with students assigned to their classroom, building relationships with their student’s families, interacting with school day teachers for planning and individual student assessments, planning and implementation of the program, and safety and risk management. Site Directors meet all the above criteria plus demonstrated supervisory ability and experience working in complex organizations.
 - At each site, the Site Director, Program Director, and line staff meet weekly for professional development: to look at progress toward site goals vs. the site implementation plan, address any issues that arise, plan for special events, and celebrate successes. Site Directors also convene monthly meetings with school day staff and principals at each site. The Y creates and updates manuals annually, and creates parent handbooks and materials in multiple languages.
 - Additional administrative structures: Our partners maintain all required and appropriate insurance for each program to protect all staff, managers, students, volunteers, and parents during all program activities. Our

After School Education and Safety Program Plan Guide

professional fiscal staff maintain detailed accounting of all program expenses and the sources of matching funds. Our partner HR departments maintains records on all employees, and our Site Director has employee and participant records that are up to date and accessible to qualified staff at the site level.

COOs, Mary Hoshiko Haughey (Y) oversee all after school programs. Mary Hoshiko Haughey is a member of the California State After School Advisory Committee, an American Leadership Forum Senior Fellow, and is involved in collaborative and community partnerships throughout Silicon Valley and the state. She also serves as the national leader for the YMCA movement to create quality expanded learning programs and youth health and wellness initiatives.

- Provide the program organizational structure including succinct description of staff roles (e.g., “Staff responsible for homework support for grade three and science activities for grades three through five.”), lines of supervision for each site or groups of sites, frequency of meetings, and methods of communication.
- Describe the process and time frames for periodic review of the program plan and how community partners and other external stakeholders were involved in the process.

Communication between Y program staff and school day staff and administrators is facilitated through the Site Director, who works closely with the school to address individual students’ specific needs. The Y secured an agreement with Rocketship that the Site Director will be treated as a member of the school staff and attends regular staff meetings. In our experience, this is a highly effective strategy. We maintain communication on three levels in which not only do we review program plans but also utilize as check-in:

1. At the school site, Site Directors meet regularly with classroom teachers, principals, specialized school staff (resource teachers, counselors, etc.), and parents to ensure each site’s program is effectively addressing the needs of its students, parents, and school day staff. Site Directors also provide day-to-day management and troubleshooting with other community-based organizations (CBOs), public agencies, and individual contractors at their site; convene weekly staff meetings and monthly site team meetings (staff, partners, advisory committee, principal/designee); and support collaborative problem-solving between the staff, school faculty, CBOs, and district offices.
2. At the district level, leadership maintains regular contact with district Directors of Curriculum and Instruction, Student Services, and other relevant district leaders to share information, leverage resources, and plan for sustainability.
3. At the county level, Program Directors attend monthly Santa Clara County After School Collaborative meetings to share resources, best practices, training, and sustainable workforce planning. Mary Hoshiko Haughey oversee all of our after school programs, and also attend monthly Region 5 grantee meetings for grant and legislative updates and training events.

After School Education and Safety Program Plan Guide

- Describe the system in place to address the following program administration requirements:
 - Fiscal accounting and reporting requirements.
 - Obtaining local match (cash or in-kind services) of one-third of the state grant amount (*EC* Section 8483.7[a][7]).
 - Attendance tracking, including sign-in and sign-out procedures. Early release and late arrival policies and procedures (*EC* Section 8483[a][1]). Refer to the CDE’s Policy Guidance Web page at <http://www.cde.ca.gov/lb/ba/cp/earlyreleaseguide.asp>.

The YMCA and the district have a strong accounting system for adherence to the grant fiscal requirements. The YMCA dedicates a cost center for each school site. As expenses for the program are incurred (personnel and non-personnel), they are directly attributed to their school cost center and general ledger account.

The YMCA employs a contract grant manager who verifies expenses to each cost center and, in particular, pays close attention to the 85%-15% allocation. Accounting “closes” every cost center each month during a review process. Each quarter, the grant contract manager compiles each cost center to submit to the district CFO for reporting. The report to the CFO is reviewed by the YMCA COO for accuracy. The YMCA also has an annual independent audit. Upon receipt of the YMCA expenditure report, Rocketship views the report and submits it to the State via ASSIST. Our YMCA performs an annual program compliance audit.

Attendance is recorded on a daily basis using a roster and a sign-in/out process. Upon arrival to the program, staff sign each student in with staff name and time of arrival. At YMCA locations, when parents arrive to pick up their child, they sign out with their parent name and time of pick up and include an early release code if applicable. If a parent arrives early, the early release policy is enacted. The parent must sign on the roster the reason for each pick up and what condition meets the policy requirements. Early release policy available upon request.

1. A plan to provide for each student who qualifies for Free and Reduced Price Meals (FRPM) at least one nutritionally adequate meal during each program day (Section 8483.76(e) of the *Education Code*);
2. An attendance and early release policy for the program that is consistent with the local educational agency's early release policy for the regular school day (Section 8483.76(f)(2) of the *Education Code*).

After School Education and Safety Program Plan Guide

3. If the grant recipient changed the program location to an alternate location or school site during implementation of SB 429, the revised program plan must also contain a plan to provide safe transportation pursuant to Section 8484.6 *EC*.
4. The After School provider program manager meets annually with the school district personnel or as needed to ensure that the Program plan is updated and that it is being implemented.
5. The School principal, secretary and the after school site coordinator meet at the beginning of the year to review the plan and also ensure that the school program plan has the ASES plan incorporated as well with aligned goals/requirements/measurements/evaluations etc.

Rocketship will work in partnership with the YMCA to write, revise and monitor the Program Plan. The Program Plan will be revised annually in the first quarter of the school year (Aug-September) and is a living document supporting the goals and delivery of the ASES After School Program. Monthly meetings will inform any written revisions. Monthly meetings occur year round. The Program Plan is shared with all levels of staff to ensure understanding of program goals aligned with the California Quality Standards for Expanded Learning. Together, monitoring will occur throughout the year through site monitoring visits, meetings and phone calls.

After School Education and Safety Program Plan Guide

12–Sustainability:

- Describe the possible partnerships and funding sources, a schedule for revisiting the sustainability plan, and who is responsible for resource development.

The partners are committed to sustaining quality programs at all of our sites. We engage in constant fundraising through the YMCA of Silicon Valley and the national YMCA to support after school programming. The balance of the funding is raised through individual donations, corporate and community giving. We also leverage federal funding for healthy meals and snacks from the Child and Adult Care Food Program and National School Lunch Program (CACFP and NSLP.)

The school sites and partner districts are the first source of resources that are invaluable for sustainability. Their contributions of facilities, staff time, credentialed teachers, training, data, and other supports are critical. Under California’s Local Control Funding Formula (LCFF), many of the priorities for school sites can be addressed through quality out-of-school time programming. Diversity in funding and partnership is key to our long-term sustainability plan. The plan includes leveraging district funds including LCFF and identifying after school as a key strategy in district LCAPs, grant

After School Education and Safety Program Plan Guide

and individual donations fundraising, federal funding for healthy meals and snacks, and partnership resources for training, family resources, and curricula.

We meet with our partner sites and districts at the beginning and end of each school year, and we address sustainability issues for each site at the fall meeting every year. We are working with program grantee intensively to develop a detailed sustainability plan starting three years before the expiration of the grant.

Our YMCA After School Programs will continue to be supported by ongoing federal and state categorical funds. Partners also contribute in-kind and cash matching resources; specific contributions are outlined in our attached Letter of Agreement.

Our partnerships demonstrate commitment to delivering, enriching, and sustaining after school programs. We actively seek funding to continue and adapt our programs, which have proven to be a well-balanced and effective approach to making a real difference in the lives of children, their families, and our community. We have successfully sustained our original sites and added many new sites since we began providing after school programs in 1998. Once we established comprehensive programs in schools, their success and value became evident to teachers, parents, students, community members, and funders who share our commitment to children and families.
